» SUMMARY

I am a Test Engineer with an enthusiastic and smiling attitude.
I am not attached to any language and like to discover new easier ways of solving problems.
As much as I like to code, I believe it's only a small portion of the solution. The bigger part being good communication with a clear and shared vision.
I have been building automated tests for the past 10 years, ensuring the quality over multiple types of projects. I am well organized, proactive, problem solving oriented and able to work under pressure.
I am particularly interested in driving test strategies, managing and building high quality softwares over multiple teams.

» SKILLS

Tester
Automated tests
Selenium
Mocha
Supertest
Native iOS / Android
ScalaTest
Test plans & test cases
Load / Stress / Perf tests
Logs Analysis
Monitoring
Postman

Developer
NodeJS
Ruby on Rails
Git / Github / Bitbucket
Atlassian suite
PostgreSQL / MySQL

Cloud
AWS
Kubernetes
Kafka

CI/CD
Jenkins
Codefresh

Other
Docker
Grafana
Kibana/ELK
Level 3 support
User training & doc
Agile / Scrum methods

» EMPLOYMENT

Januray 2017 – Today
Lead Software Engineer in Tests

Bestmile (www.bestmile.com) | Lausanne, CH

I manage the **product quality** of the Bestmile's mobility cloud platform, over **multiple teams** working on **microservices**, various different technologies and platforms (backend, frontend, mobile, sre).
I **review, analyze** product epics/stories in order to set clear **acceptance** and **exit criterias**.
I **collaborate** with engineers to **develop effective strategies** and **test plans**.
I implement **automation strategy** and **automated tests/scripts** through different tools and **CI/CD pipelines**.
I provide **Level3 support**, helping to **troubleshoot issues** and writing RCA.
I ensure the **architecture stability** and **scalability** with the SRE team, doing **performance tests, stress tests, load tests...**
I'm also **responsible for 2-3 other QA**, driving activities and coaching them.

July 2014 – December 2016
Quality Assurance Engineer

Loterie Romande (www.loro.ch / jeux.loro.ch) | Lausanne, CH

I have implemented from scratch a **tests automation framework** for online lottery games, sports bet and **mobile applications**.
I **reviewed product specifications** and **implementations**.
I was responsible to **write, execute test cases** and to **analyze results**.
I was **reporting bugs** and errors to external development teams.

July 2013 – January 2014

Quality Assurance Engineer

GateMedia SA (www.gatemedias.ch) | Renens, CH

My role was to manage the *website, mobile* and *embedded apps quality* and to ensure a *smooth user experience* through both *manual* and *automated testing* of the entire site and app features.

June 2011 – June 2013

Quality Assurance Engineer

OFFICIAL.FM (www.official.fm) | Geneva, CH

I was responsible for the development of *test plans* and *test cases* as well as programming automatic tests using *Selenium, scripts* etc... Ensure the adherence between Business, product requirements and solutions delivered by the dev team.

October 2009 – November 2010

Web Administrator / Developer / Photographer

Groupe AGSKO (www.groupeagsko.com) | Troyes, FR
